FALL AND WINTER, 1955-1956

Once again we present our Fall List of choice modern glads for those of our customers who wish to buy a part or all of their bulb requirements in the fall. Note the large cash discounts we offer (on the order blank) and you will see one of the big reasons why the number of fall and early winter orders increases yearly. Another reason is that some varieties and sizes sell out early, and those who wait for our January catalog to order may be disappointed in some cases.

Would you like to receive a bulb or two of a choice new variety at little extra cost? With your order of \$5.00 or more, if you will agree to send us (after you receive your order) the amount of postage shown on the package, we will include with your order a new 1955 or 1956 introduction (our choice) valued at two or three times the postage cost. This is in addition to our usual extras. If you wish to refund the postage to us and receive this special new bulb, just check the space provided on the order blank. Of course, you may include extra for postage when sending in your order, if you wish. However, we cannot keep books on postage or refund for any overpayment, but will try to balance any overpayment by sending something extra in bulbs.

A WORD ABOUT PRICES

Our fall list is printed before prices have been established on all varieties. If some are too low, it is your gain. If we are too high on any varieties, we will add extra bulbs to make up the difference. Just leave it to us—we guarantee your satisfaction.
